

HENOK BIRHANU TADESSE

CORE SYSTEMS & SOFTWARE ENGINEER | FULL-STACK DEVELOPER | PRODUCTION SUPPORT

Addis Ababa, Ethiopia | +251 933 738 330 | henok9450@gmail.com | linkedin.com/in/henok-birhanu | github.com/Henok9450

PROFESSIONAL SUMMARY

Multi-disciplinary **Core Systems & Software Engineer** with 10+ years of enterprise IT experience bridging mission-critical core banking platforms (Oracle FLEXCUBE, WebLogic, SOA middleware, SQL transaction analysis) with modern **full-stack software development** (React 19, Next.js, Angular, TypeScript, Node.js, Firebase, REST APIs). Proven track record delivering 24/7 enterprise production support, high-availability architecture, API-first integration, and production web applications. Certified in **PMP®** and **ITIL® v4**.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Core Banking & Systems:** Oracle FLEXCUBE, L2/L3 Support
- **Middleware & Integration:** WebLogic, SOA, JMS, REST/SOAP APIs
- **Databases & SQL:** Oracle Database, PL/SQL, MySQL, PostgreSQL Responsive UI
- **Production Troubleshooting:** RCA, Defect Investigation, Logs
- **Release & Delivery:** Testing, UAT, CI/CD Concepts, Git
- **Full-Stack Development:** React 19, Next.js, Angular, TypeScript
- **Backend & Cloud:** Node.js, Express, Firebase Firestore, Auth
- **Frontend Engineering:** Tailwind CSS, HTML5, CSS3, RxJS,
- **Automation & Scripting:** Python, Bash/Shell, Scheduled Jobs
- **Methodologies:** ITIL v4 Service Mgmt, PMP® Project Delivery

SELECTED ACHIEVEMENTS

- Resolved complex enterprise production incidents across application, middleware, database and integration layers via structured log and SQL analysis.
- Architected and deployed production web applications featuring API-first data synchronization, real-time tracking, and role-based access control.
- Supported Oracle WebLogic/SOA services and third-party integrations, including deployment, connectivity, JMS and SSL/TLS troubleshooting.
- Implemented FLEXCUBE log extraction and SIEM forwarding, significantly improving operational visibility and incident response times.

PROFESSIONAL EXPERIENCE

Principal Officer, Core Systems | Zemen Bank S.C., Addis Ababa | Dec 2023 – Present

- Provide L2/L3 production support for core banking and enterprise applications; own incidents and service restoration within SLA.
- Support Oracle FLEXCUBE and integrated banking services; investigate application, transaction and configuration issues.
- Administer/troubleshoot Oracle WebLogic and SOA middleware, including deployments, JMS, SSL/TLS, JKS keystores and connectivity.
- Troubleshoot REST/API integrations by correlating application, middleware, Linux and database evidence.
- Use Oracle SQL for transaction investigation, validation, reconciliation and root-cause analysis.
- Support releases, patches, configuration changes, UAT and post-deployment validation; coordinate with development, infrastructure, security and vendors.
- Maintain incident records, operational procedures and knowledge documentation; build Python/Bash automation for repetitive tasks.

Section Head, Core Banking System Management & Support | Berhan Bank S.C. | Dec 2022 – Dec 2023

- Led core banking application support and coordinated resolution of high-priority incidents, defects and service requests.
- Supported application configuration, testing, deployment and post-release validation; performed SQL/log-based troubleshooting and RCA.
- Coordinated vendors and technical teams through resolution; provided mentoring and maintained support documentation.

PROFESSIONAL EXPERIENCE — CONTINUED

Core Banking Application Support Engineer | Berhan Bank S.C. | Dec 2019 – Dec 2022

- Provided production L2/L3 support for core banking applications, investigating application, transaction, integration and data issues.
- Supported FLEXCUBE operations, SQL troubleshooting, system testing, UAT, releases and application changes.
- Worked with development, infrastructure and vendors to resolve incidents and restore services.
- Maintained incident records, troubleshooting procedures and operational documentation.

IT / Application Support Specialist | Berhan Bank S.C. | Aug 2016 – Nov 2019

- Provided first- and second-line support for enterprise applications, users, operating systems and connectivity issues.
- Assisted with installation, configuration, testing, maintenance and user support for business systems across branch networks.
- Troubleshot hardware, software and network issues and escalated complex incidents appropriately.

FEATURED SOFTWARE ENGINEERING & DEVELOPMENT PROJECTS

SelahCMS — Enterprise Cell & Member Management System | *Angular, TypeScript, Firebase, REST APIs, RxJS*

- Architected a responsive enterprise management platform featuring an API-first integration layer to ingest and synchronize member records from external upstream databases.
- Implemented role-based authentication (Firebase Auth), hierarchical permissions, real-time state synchronization (RxJS), and Cloud Firestore data modeling for high-speed offline-capable querying.
- *Live Production:* selah-cms.vercel.app | *GitHub:* github.com/Henok9450/SelahCMS

GoodNews Cake & Catering — Commercial Platform & Order Tracking | *React, JavaScript, CSS3, Vercel CI/CD*

- Engineered and deployed a responsive commercial web platform featuring interactive dynamic menu catalogs and custom catering order workflows.
- Implemented a real-time order tracking pipeline providing transparent fulfillment status updates for customers across mobile and desktop devices.
- *Live Commercial Platform:* goodnews-cake-and-catering.vercel.app | *GitHub:* github.com/Henok9450/goodnews-cake-and-catering

Interactive Celebration & Event Platform | *React, TypeScript, Tailwind CSS, Real-Time Sync*

- Built an interactive event platform featuring a real-time collaborative Digital Wish Signboard allowing invited guests to write, sign, and broadcast personal wishes live.
- Integrated RSVP management, responsive countdown schedules, and edge deployment on Vercel with sub-second page loads.
- *Live Demo:* dere-and-tinsu-wedding.vercel.app | *GitHub:* github.com/Henok9450/dere-and-tinsu

EDUCATION & CERTIFICATIONS

- **BSc in Computer Science** — Madda Walabu University, 2016
- **PMP® – Project Management Professional (PMI) | ITIL® 4 Foundation / Certified (AXELOS / PeopleCert)**
- **AWS Certified Solutions Architect – Associate | Oracle Java SE 11 Developer**
- **Oracle Database & WebLogic Administration | Oracle SOA Administration | CCNA**
- **API Integration & Data Science Specialization**

COMPREHENSIVE TECHNICAL ENVIRONMENT

Web & Frontend: React 19, Next.js 15, Angular, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, RxJS

Backend & Cloud: Node.js, Express, Firebase (Firestore, Auth), AWS fundamentals, RESTful APIs, SOAP

Operating Systems: Oracle Linux, Linux/Unix, Windows Server

Monitoring & Ops: SIEM, Log Analytics, Grafana, Zabbix, OPatch, WLST

Delivery & Tools: Git, Postman, Functional/Integration/UAT Testing, Vercel

Middleware: Oracle WebLogic, Oracle SOA, ESB, JMS, JNDI, JKS Keystores

Databases: Oracle Database, PL/SQL, MySQL, PostgreSQL, MongoDB

Security: SSL/TLS, Certificates, Role-Based Access Control, Keystores

Automation: Python, Bash/Shell, Scheduled Cron Jobs, CI/CD

Service Mgmt: ITIL v4, Incident, Problem, Change & Release Management

SELECTED TECHNICAL RESPONSIBILITIES & APPLICATION DELIVERY

- **Incident Ownership & RCA:** Receive, prioritize, resolve, and communicate enterprise incidents within strict SLA; correlate application logs, SQL queries, service responses, and Linux infrastructure evidence.
- **Full-Stack Web Engineering:** Build performant, accessible web user interfaces with strict TypeScript typing, responsive design tokens, and modular state management architectures.
- **Release & Configuration Management:** Support code/configuration promotion, patch deployments, and synchronized cross-environment changes with rigorous UAT and post-deployment validation.
- **API Integration & Middleware Tuning:** Troubleshoot REST/SOAP services, WebLogic connection pools, JMS queues, and secure third-party banking integration interfaces.
- **Knowledge & Process Improvement:** Maintain standard operating procedures (SOPs), incident histories, technical documentation, and mentor junior support/engineering staff.

PROFESSIONAL STRENGTHS

- Customer-focused support & user empathy
- Strong attention to code quality & reliability
- Calm prioritization under production pressure
- Vendor & international team management
- Analytical, structured root-cause troubleshooting
- Clear technical communication across stakeholders
- Cross-functional agility (Dev + Ops + Systems)
- Continuous learning & improvement mindset

LANGUAGES & MOBILITY

- **English** — Fluent; **Amharic** — Native
- **Open to relocation to the UAE and international opportunities.**
- Available for full-time onsite, hybrid, and remote software engineering & core systems roles.
