

# HENOK BIRHANU TADESSE

CORE SYSTEMS & SOFTWARE ENGINEER | FULL-STACK DEVELOPER | APPLICATION SUPPORT

Addis Ababa, Ethiopia • +251 933 738 330 • henok9450@gmail.com • linkedin.com/in/henok-birhanu • github.com/Henok9450

## EXECUTIVE SUMMARY

Multi-disciplinary **Core Systems & Software Engineer** with 10+ years of enterprise IT experience spanning mission-critical core banking platforms (Oracle FLEXCUBE, WebLogic, SOA middleware, SQL transaction analysis) and modern **full-stack software development** (React 19, Next.js, Angular, TypeScript, Node.js, Firebase, REST APIs). Demonstrated expertise in high-availability enterprise production support (L2/L3), structured root cause analysis (RCA), API-first architecture, and modern cloud web deployments. Certified in **ITIL® v4**.

## CORE COMPETENCIES & TECHNICAL EXPERTISE

|                                                                               |                                                                               |
|-------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| • <b>Core Banking:</b> Oracle FLEXCUBE, L2/L3 Incident Support                | • <b>Frontend Engineering:</b> React 19, Next.js 15, Angular, TypeScript      |
| • <b>Enterprise Middleware:</b> Oracle WebLogic, Oracle SOA, JMS, ESB         | • <b>Backend &amp; Cloud:</b> Node.js, Express, Firebase Firestore, Auth, AWS |
| • <b>Databases:</b> Oracle Database, PL/SQL, MySQL, PostgreSQL                | • <b>APIs &amp; Integration:</b> REST/SOAP Web Services, Postman, Webhooks    |
| • <b>System Administration:</b> Oracle Linux, Windows Server, Shell/Python    | • <b>UI &amp; Styling:</b> Tailwind CSS, HTML5, CSS3, RxJS, Responsive Design |
| • <b>Security &amp; Operations:</b> SSL/TLS, Keystores, SIEM, Grafana, Zabbix | • <b>Service Mgmt:</b> ITIL® v4 Framework, Change & Release Management        |

## KEY CAREER ACHIEVEMENTS

- **Enterprise High Availability:** Resolved complex production incidents across application, middleware, database, and integration layers using structured log correlation and SQL tracing.
- **Full-Stack Development Delivery:** Architected and deployed production web applications featuring API-first data synchronization, real-time tracking, and role-based access control.
- **Middleware Infrastructure:** Administered Oracle WebLogic/SOA environments and third-party banking integrations, ensuring continuous operational uptime and robust JMS messaging.
- **Operational Visibility:** Implemented FLEXCUBE log extraction and SIEM forwarding, significantly improving enterprise security monitoring and incident response times.

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                          |

## PROFESSIONAL EXPERIENCE (CONTINUED)

### Core Banking Application Support Engineer — *Berhan Bank S.C.*

Dec 2019 – Dec 2022 | Addis Ababa

- Delivered L2/L3 production support for core banking applications, investigating application, transaction, and integration anomalies.
- Supported FLEXCUBE daily operations, database SQL troubleshooting, system testing, UAT, and application maintenance patches.
- Collaborated with development, infrastructure, and international vendor teams to maintain high availability and minimize downtime.

### IT / Application Support Specialist — *Berhan Bank S.C.*

Aug 2016 – Nov 2019 | Addis Ababa

- Provided first- and second-line support for enterprise business systems, operating systems, user access, and network connectivity.
- Assisted with installation, configuration, testing, maintenance, and end-user support across banking branch networks.
- Diagnosed and resolved hardware, software, and networking issues with structured escalation management.

## FEATURED SOFTWARE ENGINEERING & DEVELOPMENT PROJECTS

### SelahCMS — Enterprise Cell & Member Management System

[Angular](#) • [TypeScript](#) • [Firebase](#) • [RxJS](#)

- Architected a responsive enterprise platform featuring an API-first integration layer to ingest and synchronize member records from external organizational databases.
- Implemented role-based authentication (Firebase Auth), hierarchical permissions, real-time reactive state synchronization (RxJS), and Cloud Firestore NoSQL querying.
- *Live Production:* [selah-cms.vercel.app](https://selah-cms.vercel.app) • *GitHub:* [github.com/Henok9450/SelahCMS](https://github.com/Henok9450/SelahCMS)

### GoodNews Cake & Catering — Commercial Web Platform

[React](#) • [JavaScript](#) • [Order Tracking](#) • [CI/CD](#)

- Engineered and deployed a responsive commercial web platform featuring interactive dynamic menu catalogs and custom bakery ordering workflows.
- Built a real-time order tracking pipeline providing customers with transparent fulfillment updates across mobile and desktop devices.
- *Live Platform:* [goodnews-cake-and-catering.vercel.app](https://goodnews-cake-and-catering.vercel.app) • *GitHub:* [github.com/Henok9450/goodnews-cake-and-catering](https://github.com/Henok9450/goodnews-cake-and-catering)

### Interactive Celebration & Event Platform

[React](#) • [TypeScript](#) • [Tailwind CSS](#) • [Real-Time Sync](#)

- Built an interactive event platform featuring a real-time collaborative Digital Wish Signboard allowing invited guests to post and broadcast live wishes.
- Integrated RSVP management, responsive countdown schedules, and edge deployment on Vercel with sub-second page loads.
- *Live Demo:* [dere-and-tinsu-wedding.vercel.app](https://dere-and-tinsu-wedding.vercel.app) • *GitHub:* [github.com/Henok9450/dere-and-tinsu](https://github.com/Henok9450/dere-and-tinsu)

## EDUCATION & CERTIFICATIONS

- **BSc in Computer Science** — Madda Walabu University (Graduated 2016)
- **ITIL® 4 Foundation / Certified** — AXELOS / PeopleCert (IT Service Management)
- **AWS Certified Solutions Architect – Associate** — Amazon Web Services
- **Oracle Database & WebLogic Administration | Oracle SOA Administration**
- **Oracle Java SE 11 Developer | CCNA (Cisco Certified Network Associate)**
- **API Integration & Data Science Specialization**

COMPREHENSIVE TECHNICAL ENVIRONMENT & TOOLING

|                                                                                                                                      |                                                                                                                  |
|--------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| <b>Web &amp; Frontend:</b> React 19, Next.js 15, Angular, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, RxJS, Responsive Design | <b>Middleware &amp; Messaging:</b> Oracle WebLogic, Oracle SOA, ESB, JMS, JNDI, JKS Keystores, SSL/TLS           |
| <b>Backend &amp; Cloud:</b> Node.js, Express, Firebase (Firestore, Auth), AWS Cloud fundamentals, RESTful APIs, SOAP Web Services    | <b>Databases &amp; Querying:</b> Oracle Database, PL/SQL, MySQL, PostgreSQL, MongoDB, SQL Optimization & Tracing |
| <b>Operating Systems:</b> Oracle Linux, Linux/Unix, Windows Server, System Hardening                                                 | <b>Security &amp; Compliance:</b> SSL/TLS Certificates, Keystores, Role-Based Access Control (RBAC)              |
| <b>Monitoring &amp; Observability:</b> SIEM Log Analytics, Grafana, Zabbix, OPatch, WLST Diagnostics                                 | <b>Automation &amp; Scripting:</b> Python, Bash/Shell Scripting, Scheduled Cron Jobs, CI/CD Concepts             |
| <b>Testing &amp; Delivery:</b> Git, Postman, Functional/Integration/UAT Testing, Vercel Edge Delivery                                | <b>IT Service Management:</b> ITIL® v4 Framework, Incident, Problem, Change & Release Management                 |

TECHNICAL RESPONSIBILITIES & APPLICATION DELIVERY

- **Incident Ownership & Rapid RCA:** Receive, prioritize, and resolve enterprise incidents within strict SLA; correlate application logs, SQL queries, service responses, and Linux infrastructure diagnostics.
- **Full-Stack Web Engineering:** Build performant, accessible user interfaces with strict TypeScript typing, responsive design tokens, and modular state architectures (React 19, Next.js, Angular).
- **Release & Configuration Management:** Direct code and configuration promotions, patch deployments, and synchronized cross-environment changes with rigorous UAT and post-release validation.
- **API Integration & Middleware Tuning:** Troubleshoot REST/SOAP endpoints, WebLogic connection pools, JMS queues, and secure third-party banking integration interfaces.
- **Operational Documentation & Knowledge Base:** Maintain standard operating procedures (SOPs), troubleshooting guides, and incident histories; mentor junior support and engineering staff.

PROFESSIONAL STRENGTHS & LEADERSHIP ATTRIBUTES

|                                                       |                                                                    |
|-------------------------------------------------------|--------------------------------------------------------------------|
| • Customer-focused support & user empathy             | • Analytical, structured root-cause troubleshooting                |
| • Strong commitment to code quality & reliability     | • Clear technical communication across business & technical teams  |
| • Calm prioritization under mission-critical pressure | • Cross-functional agility across Software Dev, Ops & Core Systems |
| • Vendor, partner, and stakeholder management         | • Continuous learning and technology adoption mindset              |

LANGUAGES & MOBILITY

- **English** — Fluent; **Amharic** — Native
- **Open to relocation to the UAE and international opportunities.**
- Available for full-time onsite, hybrid, and remote software engineering & core systems roles.
