

HENOK BIRHANU TADESSE

APPLICATION SUPPORT ENGINEER | ENTERPRISE APPLICATIONS | PRODUCTION SUPPORT

Addis Ababa, Ethiopia | +251 933 738 330 | henok9450@gmail.com | linkedin.com/in/henok-birhanu

PROFESSIONAL SUMMARY

Application Support Engineer with 10 years of IT experience supporting enterprise applications and mission-critical banking systems. Strong in L2/L3 application support, incident/request/change management, root-cause analysis, SQL/database troubleshooting, application configuration, testing/UAT, release support, user access, API integrations and vendor coordination. Experienced with Oracle FLEXCUBE, Oracle WebLogic/SOA, Linux/Windows and high-availability production environments. ITIL v4 and PMP certified.

CORE COMPETENCIES

- L2/L3 Application Support
- Root Cause Analysis / Defect Investigation
- Application Configuration & Administration
- Release / Deployment / Migration Support
- User Access & Support
- Vendor / Stakeholder Coordination
- ITIL Service Management
- Incident / Request / Change Management
- SQL / Oracle Database Troubleshooting
- Functional / Integration / UAT Testing
- REST/SOAP APIs & Postman
- Application Monitoring / Log Analysis
- Technical Documentation / Knowledge Base
- Python / Bash Automation

SELECTED ACHIEVEMENTS

- Resolved complex production incidents across application, middleware, database and integration layers using structured log and SQL analysis.
- Supported Oracle WebLogic/SOA services and third-party integrations, including deployment, connectivity, JMS and SSL/TLS troubleshooting.
- Supported FLEXCUBE log extraction and SIEM forwarding activities, improving centralized operational visibility.
- Improved support practices through incident trend analysis, corrective actions, documentation and service-process improvement.

PROFESSIONAL EXPERIENCE

Principal Officer, Core Systems | Zemen Bank S.C., Addis Ababa | Dec 2023 – Present

- Provide L2/L3 production support for core banking and enterprise applications; own incidents and service restoration within SLA.
- Support Oracle FLEXCUBE and integrated banking services; investigate application, transaction and configuration issues.
- Administer/troubleshoot Oracle WebLogic and SOA middleware, including deployments, JMS, SSL/TLS, JKS keystores and connectivity.
- Troubleshoot REST/API integrations by correlating application, middleware, Linux and database evidence.
- Use Oracle SQL for transaction investigation, validation, reconciliation and root-cause analysis.
- Support releases, patches, configuration changes, UAT and post-deployment validation; coordinate with development, infrastructure, security and vendors.
- Maintain incident records, operational procedures and knowledge documentation; support Python/Bash automation for repetitive tasks.

Section Head, Core Banking System Management & Support | Berhan Bank S.C. | Dec 2022 – Dec 2023

- Led core banking application support and coordinated resolution of high-priority incidents, defects and service requests.
- Supported application configuration, testing, deployment and post-release validation; performed SQL/log-based troubleshooting and RCA.
- Coordinated vendors and technical teams through resolution; provided mentoring and maintained support documentation.

PROFESSIONAL EXPERIENCE — CONTINUED

Core Banking Application Support Engineer | Berhan Bank S.C. | Dec 2019 – Dec 2022

- Provided production L2/L3 support for core banking applications, investigating application, transaction, integration and data issues.
- Supported FLEXCUBE operations, SQL troubleshooting, system testing, UAT, releases and application changes.
- Worked with development, infrastructure and vendors to resolve incidents and restore services.
- Maintained incident records, troubleshooting procedures and operational documentation.

IT / Application Support Specialist | Berhan Bank S.C. | Aug 2016 – Nov 2019

- Provided first- and second-line support for enterprise applications, users, operating systems and connectivity issues.
- Assisted with installation, configuration, testing, maintenance and user support for business systems.
- Troubleshot hardware, software and network issues and escalated complex incidents appropriately.

TECHNICAL ENVIRONMENT

Core Banking: Oracle FLEXCUBE

Integration: REST, SOAP, APIs, Postman

OS: Oracle Linux, Linux/Unix, Windows Server

Monitoring: Logs, SIEM, Grafana, Zabbix

Delivery: Testing, UAT, deployment, Git

Middleware: WebLogic, SOA, ESB, JMS, JNDI

Databases: Oracle, MySQL, SQL

Security: SSL/TLS, JKS keystores, certificates

Automation: Python, Bash/Shell, scheduled jobs

Service Mgmt: ITIL, Incident, Problem, Change, Release

APPLICATION SUPPORT & DELIVERY

- **Incident ownership:** receive, analyse, prioritize, resolve and communicate application incidents and service requests.
- **Testing & quality:** participate in functional, integration, regression and UAT testing; validate defects and post-release changes.
- **Configuration & access:** support application configuration, user access requests and controlled changes.
- **Documentation:** maintain incident histories, configuration notes, user instructions, troubleshooting procedures and support knowledge.
- **Stakeholders:** work across business users, development, infrastructure, database, security and external vendors.

SERVICE IMPROVEMENT & LEADERSHIP

- Analyse service-management results and recurring incidents and recommend service enhancements based on evidence and trends.
- Participate in business-process re-engineering and identify opportunities to improve support workflows, controls and service delivery.
- Lead and mentor support staff, coordinate technical actions and track issues through closure.

EDUCATION & CERTIFICATIONS

- **BSc in Computer Science** — Madda Walabu University, 2016
- **ITIL® 4 Foundation / Certified | PMP® – Project Management Professional**
- **Oracle Database & WebLogic Administration | Oracle SOA Administration | CCNA**
- **AWS Solutions Architect – Associate | Oracle Java SE 11 Developer | Data Science | API Integration**

ADDITIONAL TECHNICAL PROFILE

Programming: Python, Bash, JavaScript, Node.js

Databases: Oracle, MySQL, MongoDB, Firebase

Tools: Postman, WLST, OPatch, Git, SIEM

Support: ITSM, ticketing, monitoring, documentation

Web: REST APIs, SOAP, React, Angular, Next.js, TypeScript

Infrastructure: Apache HTTP Server, F5/load-balancing concepts

Cloud: AWS fundamentals, CI/CD concepts

Security: SSL/TLS, certificates, access control

SELECTED TECHNICAL RESPONSIBILITIES

- Diagnose application defects by combining user symptoms, application logs, SQL results, service responses and infrastructure evidence.
- Support code/configuration promotion, application releases and synchronized changes across environments with post-deployment validation.
- Prepare concise incident/RCA documentation, track corrective actions and coordinate vendor fixes through closure.
- Monitor application health and performance, identify anomalies and recommend corrective or preventive actions.
- Support user training and explain technical issues and procedures clearly to non-technical stakeholders.

PROFESSIONAL STRENGTHS

- Customer-focused application support
- Strong attention to detail
- Prioritization under pressure
- Vendor and stakeholder management
- Analytical, structured troubleshooting
- Clear technical communication
- Cross-functional teamwork
- Continuous improvement mindset

LANGUAGES & MOBILITY

- **English** — Fluent; **Amharic** — Native
- **Open to relocation to the UAE and international opportunities.**
- Available for full-time onsite roles and production-support environments.
